

Olive oil separators

Standard scope of supply

- Three-phase, self-cleaning, gear drive separator
- Solenoid valves for operating the bowl's hydraulic system
- Speed sensor (CA 50-O) / tachometer (CA 30-O)
- Vibration sensor
- Base in painted steel
- Sight glass and alarm switch for lubricating oil level
- Cartridge filter and pressure reducer for the operating water
- Set of special tools
- Set of basic spare parts

Options

- Operating water feed unit
- Stainless steel skid

Technical information

- Product inlet: by gravity
- Water outlet: by gravity
- Oil outlet: by gravity
- Operating water consumption: < 100 l/h under normal working conditions

Model	Max Feed capacity (l/h)	Motor (kW)
CA 30-O	1,500	7,5
CA 50-O	3,000	15
